

ESA – THE NEW INTERFACE

FROM EPPINGER.

SIMPLE, FAST, ACCURATE

■ Today's tool holder interfaces are a thing of the past. New ideas are needed. We have the solution: The brand new Eppinger Interface for turret disks and tool carriages offers a highly accurate, repeatable tool holder change-over without increasing setup times. An adjustable locator plate replaces the standard tool shank and opens up vast possibilities.

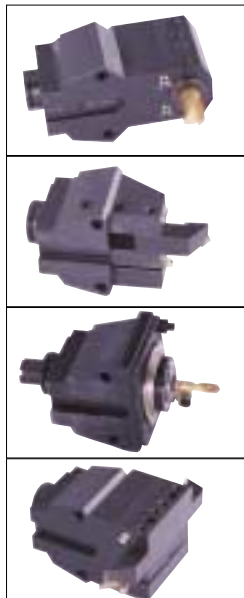

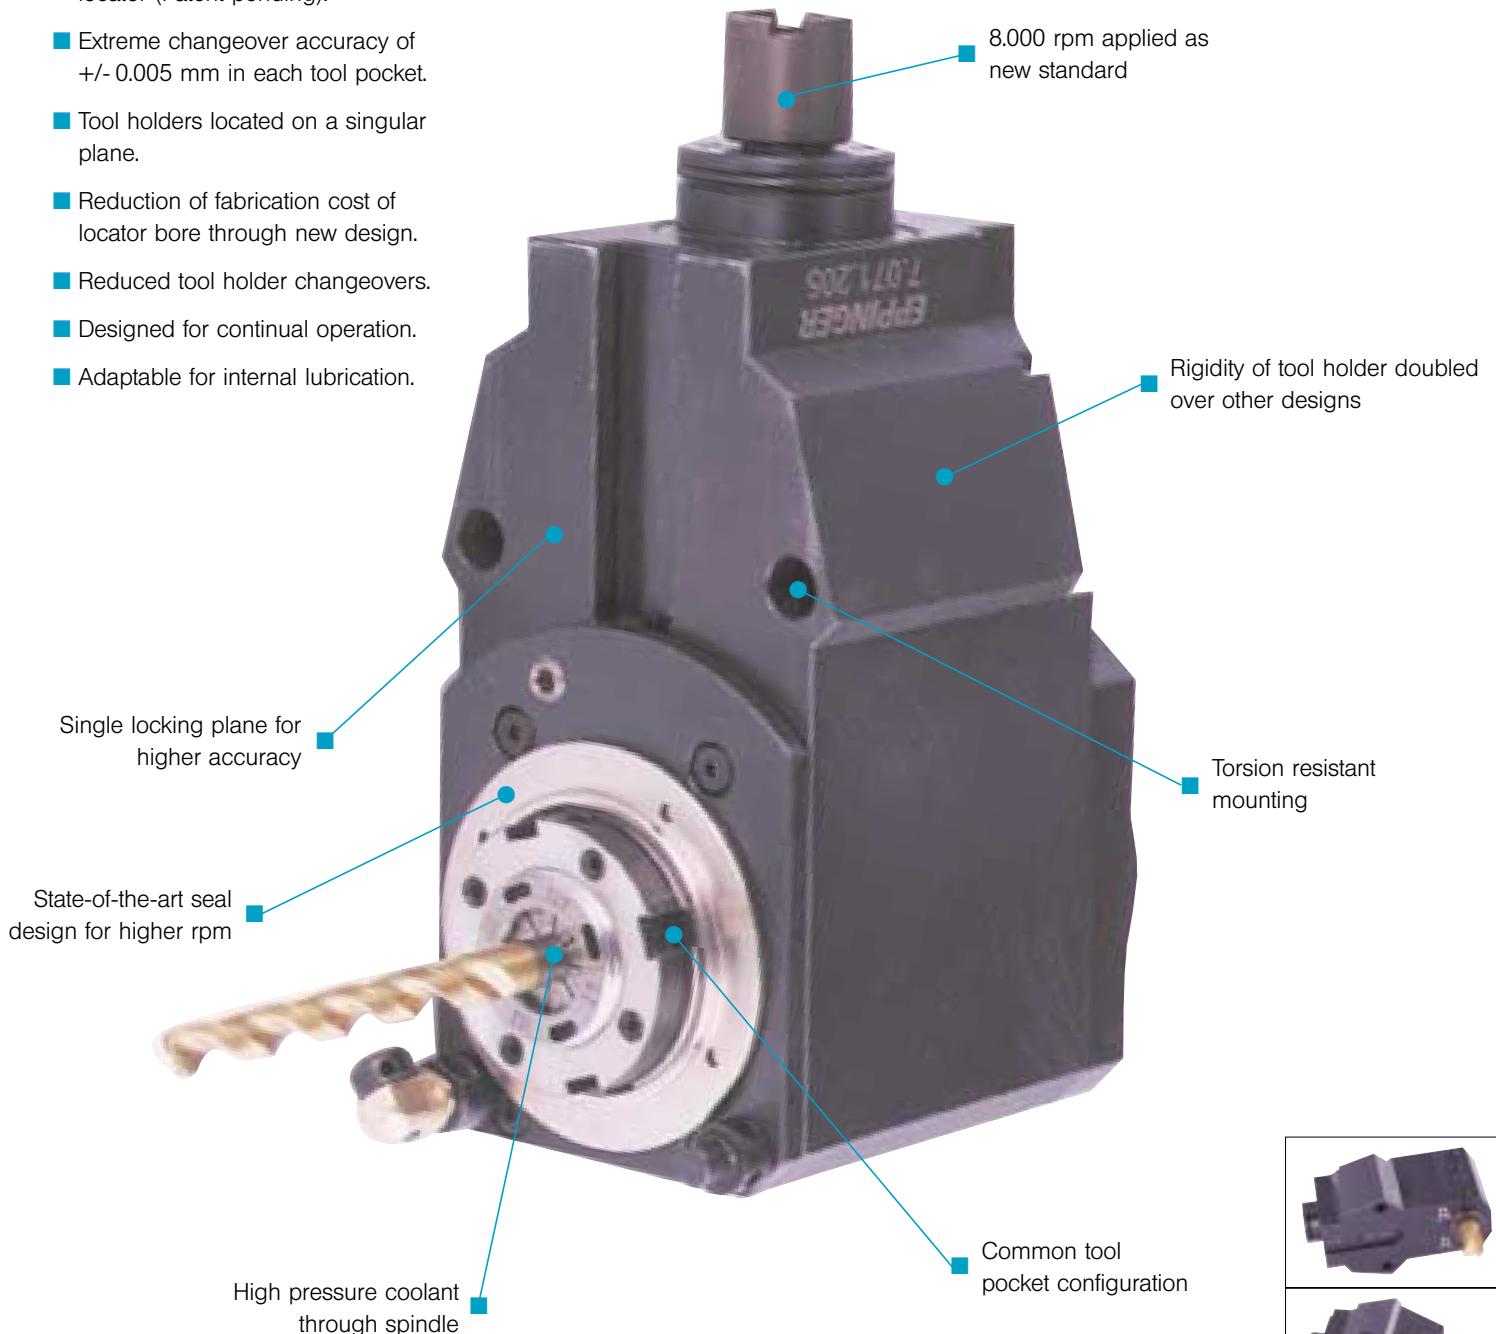

EPPINGER

ESA – THE BENEFITS

SPEAK FOR THEMSELVES . . .

- Tool holder adjustable to center line of spindle with compensation locator (Patent pending).
- Extreme changeover accuracy of +/- 0.005 mm in each tool pocket.
- Tool holders located on a singular plane.
- Reduction of fabrication cost of locator bore through new design.
- Reduced tool holder changeovers.
- Designed for continual operation.
- Adaptable for internal lubrication.
